

Price Restructure

We would like to inform all our service users that from the [1st of September 2023](#), we will be undergoing a price restructuring. At Goodall Healthcare Group, we pride ourselves in providing a high quality, efficient and warm service but we recognise that with increasing costs to running the business and the expansion of our service offerings, this leads to a natural increase in appointment prices.

The changes are detailed below.

Any appointments booked previous to this post, will be honoured at the old rate. This price change applies to any new appointment booked that is dated after the [1st of September](#)

An initial session is composed of a full case history and examination, due to the detail in our initial assessment, this means we do not guarantee treatment in an initial consultation. The appointment should take approximately 45 minutes.

We operate a 24-hour cancellation policy, if an appointment is missed or cancelled within this time (unless an emergency), we shall charge the price of a single session with the relevant clinician.

**Price
Restructure**
